The development of a Primary Care Resource Centre at Queen Margaret Hospital was agreed by NHS Fife after wide public consultation in 2002 as part of 'Right for Fife'.

This centre will have the following services:

- Podiatry
- Dietetics
- Physiotherapy
- Speech & Language Therapy
- Occupational Therapy
- Clinical Psychology
- Diabetic services
- Specialist Dental services
- Anorexia Nervosa Intensive Treatment Team (ANITT)
- Mental Health outpatients for adults, adolescents and children
- and the development of a Carers Information Point.

The aim of the Primary Care Resource Centre is to:

- Bring services closer together to the benefit of the patient ensuring better access to a wider range of services.
- Improved environment for patients and staff.
- Reduce waiting times.
- Increase the time specialists are available.
- Make sure we have efficient services and increased appointments.
- Improve existing lines of communication with secondary care.

It is proposed that these services will move to new facilities in Queen Margaret Hospital in 2014.

NHS Fife has three Public Partnership Forums. Their aim is to ensure that local people are informed about the range and location of services in their area.

The proposal requires NHS Fife to actively engage, consult and inform the local public. The consultation will give you the chance to tell us what matters to you, learn more about the proposal and have your questions answered.

This will be done through the engagement events and information from June 2013. Information will be available from the website: www.nhsfife.org/queenmargaret

Details of the engagement and information events are below:
