

**Street Light Upgrade**  
**17th May 2016**  
**Completion of Phase 5 of the planned upgrade and proposed upgrade for**  
**Phase 6.**

Total Number of Lanterns to be upgraded **29**

Total Number of Lanterns upgraded to date **21**. Cost of upgrade to date **£7,401**.

Comprising of the following;

18 off PHOSCO 42 Watt Lanterns

3 off 22Watt LED Lanterns ( Including 3 Replacement Lamp Columns on The Jetty/Horseshoe Close footpath).

The estimated cost to upgrade the remaining 8 Lanterns is **£5,840**.

The reason for the increase in cost per Lantern for the 8 remaining Lanterns is because 6 of the Lanterns will require new overhead power cable connections, the standard charge for this work is £350 per Street Light. This effectively doubles the price per Lantern.

**Phase 6 upgrade includes street lights at the following locations;**

1. The Green (Lamp No. 9) Lantern type, 42 Watt PHOSCO fitted with a Part Night Photo-Cell.
2. Junction of the High Street and Violet Lane (Lamp No. 8) Lantern type, 42 Watt PHOSCO with an All Night Photo-Cell.
3. Close to the Junction of Brixworth Road and Grooms Lane (Lamp No. 26). Because this Street Light is not in close proximity to the main village Street Lights fitted with PHOSCO Lanterns, we will be installing a 20 Watt LED Lantern with an All Night Photo-Cell at this location.

**Estimated Cost of Phase 6 £1,720.00 For Budget Year 2016/17.**

Phase 6 will complete the Lantern upgrade for the lower part of the Village.

Phase 7 for Budget Year 2017/2018 the Lantern upgrade programme will include the Welford Road Street Lights.
