

A most informative session was enjoyed by myself and my friends. BEST THING AROUND. T.C.

Great event. - Seeing kids coding and doing electronics. The country needs more of this! anon.

Very fascinating and informative. Going to look up the website when I get home. Thank you. MHG, Forres

I came across the T-exchange event by chance and found it extremely interesting. Les G. and Graham talked with enthusiasm about 3D printing, which I knew nothing about. Fascinating! Thank you. Sean.

I came to see the 3D printers and Tech in the Tolbooth. I would like to say I was / am very impressed and would love to know more. I have taken notes and have definately taken a positive from these guys. Sarah Johnston.

Great demonstrations and ideas. Wonderful to see modern technology in practice.

Very interesting and informing. Will be following up with a visit to the T-Exchange.

Encouraging to see so many young people being given the opportunity to play with computers. R. M.

Caught the attention !

Fantastic! Very informative and really useful to have The T-exchange folk about to explain it all. John robertson.

I had no idea what was going on. Nobody bothered to say "Hello" or interact with me - even though they weren't busy with any other visitors! :(

I enjoyed it. Please consider making signs with brief description of project happening at every station. When I asked questions, people were very friendly and helpful.

Don't like my picture being recorded on your machine!

What a really cool room of amazing knowledge and models and lighting-up things - My 11 year old loved it!!
