

Bourn Sports Club - Purchase of a Cricket Net

Bourn Sports Club wishes to acquire a cricket net to be located on the existing cricket wicket at Bourn recreation ground to encourage playing of cricket by Bourn residents.

At present the cricket wicket is underused. Without a net it is too time consuming and frustrating to use because of the time taken to retrieve the ball. A net would also make the wicket safer to use for those not taking part.

The following is an overhead view of the recreation ground:

The sports club imagines that the net frame will either stay out all year, or could be dismantled over the winter and stored in the container at the ground. The netting would be taken off over the winter.

The orientation of the net has been chosen so balls are kept clear of the children's play equipment to the left and behind the net.

Although the purchase and maintenance of the cricket net would be the responsibility of Bourn Sports Club, its use would be normally (except for sessions organized by the sports club) available to all users of the recreation ground.
