NET-CAGE SALMON FARMING

Who should be responsible for farming salmon safely?

1. The CONSUMING PUBLIC (price)?
2. The TAX-PAYING PUBLIC (subsidy?)
3. The SCOTTISH GOVERNMENT (legislation)?
4. NATURE (includes us!), obliged to endure the burden of fish farm pollution, pests and diseases, *which can be avoided?
5. The AQUACULTURE INDUSTRY that makes huge profits, holds massive financial resources, has never bothered to deal with or pay for safe waste disposal and – let's get this right – whose responsibility it surely is?
