

I am a blue card holder. At present it is too difficult so I do not go as often as I would like.

As I am in a wheelchair accessible toilets are all important. Plenty of space is required with the sink away from the 'loo' as the wheelchair needs the room.

A considerable difference as I have had 3 knee replacements, the left one twice. I also have 3 collapsed vertebrae in my back. This makes walking too far difficult. Plus a hip operation.

I cannot use the Social Club because of the access issues. I use a walking frame and am partially sighted. Level access in a bright, light building would allow me to use the building.

All on one level will be excellent as I now have a problem with stairs due to a degenerative spine condition.

Improved access will enable us to attend functions and events which at present can only be undertaken with difficulty due to disabilities.

A lot of difference! Being disabled I find it difficult to get from the car to the current hall.

It will make the centre accessible to those with mobility issues such as my mother-in-law and several friends.

My mother has very limited mobility, so having everything fully accessible will help her attend events she currently has to miss.

Big difference as I have back/hip problems & steps are difficult to use

I can invite friends with disabilities to events that I organise in the knowledge that access is available to all. Brilliant!

It will help our disabled grandchild

Easy access as I have a disability

For my husband being all on one level will make it easier to access.

Easier parking & disabled access will help me to retain my independence

My partner has disabilities. When we went to the Social Club (which is on a slope) to vote it was very painful for her. It will make a big difference for her on the flat.

I work in the Meadows Care Home. This will make a huge difference for us with easy access for wheelchairs, toilet facilities, etc..

Baby changing facilities will be fantastic! Being on one level will be easier with buggies.

It will make a great difference. We are often unable to use the car park at the current hall, and getting kids from the car to the hall feels very unsafe.

We suffer from osteoarthritis. We need space to park our car.

The hill approaching the present building is a hindrance to many people of my age (71) attending functions (e.g. Cinema).

I will definitely attend more functions in the new hall than I do at present.

I have a young daughter. Access with pram is very difficult. Also accessible changing facilities are so important for parents.

Easier parking and new baby changing facilities will make a big difference to me and my 1 year old.

I will be more likely to attend community events because of the new facilities.

Would actually make me keep fit instead of having to travel and just not doing it.

Parking at the social club is terrible, never enough room and the sloping gravel car park is really dangerous

Would make use of the gym and hopefully changing rooms for Dornoch City FC games.

A modern, built-for-purpose facility will make it more likely for me to attend.

Would be able to take less able relations to events.

Will be of great help if acoustics are better.

Parking facilities at the current Social Club are inadequate. It is difficult to manoeuvre wheelchairs and buggies across the sloped car park.

It is difficult for Heritage Society members to attend some events due to lack of parking & the sloping car park.

Massive difference. Sometimes I don't attend events because of a lack of parking.

Please include secure cycle rack/shed as would like to cycle there

Acoustics are important to me as I wear two hearing aids and clarity is crucial. I am hoping to use a quiet room to teach lip reading classes.

When I attend dance class I have to park away from hall as the car park is already full, and so carry large sound equipment etc some distance.

I work for UHI based in Dornoch. We are holding a major international conference in the Social Club in 2016. Improved acoustics, parking and accessibility would have been extremely helpful in attracting a wider audience. We will certainly consider holding more events in Dornoch when the new Centre is available.
