ESTIMATE

To:

Repair of Sandstone Stonework to all exterior elevations of property in Lithomex

Removal of all inferior and eroded sandstone surfaces including window and doorway ingoes where deemed necessary to all elevations of the property. Prepare all inferior and eroded surfaces to a depth of approx 15-25mm, or to a sufficient depth whereby all inferior sandstone surfaces are removed and such a good surface is found to achieve good adhesion for Lithomex stone re-facing to be applied.

To:

Repointing of Stonework

To finish repaired surfaces in detail as before and to colour match to the original stonework and repoint in Lime Putty to all Ashlar joints leaving a light brush finish and Lime Mortar (NHL 3.5 grade) light brush and stipple finish to remaining stonework.

Estimated Contract Price - £78245.00

Note: This estimate will remain validated for a period of 90 days from 09.10.2013..
