

Autumn migrants on the edge of Europe

The Outer Hebrides, straddling the western coast of Scotland, is an area of outstanding natural beauty. This tour visits Lewis and Harris in the north and the southern islands of North and South Uist and Benbecula. Habitat ranges from the wind-lashed west coast to upland moors and bogs and, on the eastern seaboard, indented sea lochs. In recent years, the islands have built up a reputation for rare and unusual species. Extensive coverage of the islands has also revealed a rich vein of migrants and vagrants from North America. Anything can and does turn up on these remote islands of Scotland. On recent tours we have found our clients White-billed Divers, Surf Scoter, Laughing and Bonaparte's Gulls, Grey and Red-necked Phalaropes, Snowy Owl, Long-tailed and Pomarine Skuas and Red-rumped Swallow. If wind conditions are favourable, you can expect close views of Leach's Storm-petrel, Sabine's Gull and rare waterbirds from North America; Lesser Yellowlegs, Buff-breasted Sandpiper, American Coot, Lesser Scaup and Ring-necked Duck have been seen regularly in recent years.

■ This tour starts and finishes in Inverness which has good flight connections with the rest of Britain. Clients should book accommodation in Inverness on the nights of September 21st and 28th. It can be combined with our Scottish Highlands autumn tour on page 15 or the Highlands and Aberdeenshire tour on page 21.

Day 1: Morning departure from Inverness, passing over Skye to Uig for a ferry crossing to Lochmaddy on North Uist. En route, a short stop at Broadford Bay on Skye - one of the few areas with extensive areas of mud and grass islands. Waders may be numerous and we will be on the lookout for rare migrants, which in recent years have included Little Stint and Curlew Sandpiper. The bay is also a regular stopping off point for Pale-bellied Brent Geese and overhead skeins of Pink-footed Geese heading east and south. As our journey passes through the mountains, it is possible to have views of both eagles and other raptors. On arrival in North Uist, we check Vallay Strand, a huge inter-tidal area, for waders and wild-fowl and the possibility of American vagrants. Transfer to our base on Benbecula for three nights.

Days 2-3: The Uists have a range of habitat from shallow lagoons, marshes, machair and dune systems to the open sea and sandy beaches. Our main interest is in locating migrants from Europe and North America. In recent years The Range and

Group Size: 8

Birds: 100-120

nearby Loch Bee have hosted Pectoral, Buff-breasted and White-rumped Sandpipers and Grey and Wilson's Phalaropes. On lochs and sheltered sea bays, we may find Great Northern, Red-throated and Black-throated Divers and a wide range of ducks including Long-tailed Duck, Greater Scaup and Common Goldeneye. The return passage of waders comprises Purple Sandpiper, Common Knot, Dunlin, Sanderling and Ruddy Turnstone. On surrounding moors and high peaks, we have a chance of finding White-tailed and Golden Eagle, Peregrine Falcon, Merlin, Short-eared Owl and Hen Harrier. Agricultural land holds Twite, Snow Bunting and, sometimes, Lapland Buntings. Rubha Ardvule is a noted seawatching point in

westerly winds, providing close views of seabirds including Leach's Storm Petrel and, on occasions, Sooty Shearwater and Sabine's Gulls. Various lochs may have Whooper Swan and wildfowl including American Wigeon and Ring-necked Duck in recent autumns. Stands of bushes may harbour migrants and occasional rarities. Loch Aynort has mature trees, a rare habitat on the lower islands. Careful searching in the right weather conditions may reveal the presence of Spotted and Pied Flycatchers, Willow Warbler, Blackcap, Goldcrest, Common Redpoll, Common Crossbill and the local races of Dunnock and Eurasian Wren.

Day 4: Today a day trip is planned to the island of Barra, which is the most southern of the Western Isles. In recent years the island has built up a reputation for attracting rare birds from North America and Asia. Any patch of bushes or trees is worth checking for regular migrants including Yellow-browed Warbler, Pied and Red-breasted Flycatchers and, perhaps, the irregular Ring Ouzel. In addition to these species, Barra holds reasonable numbers of Golden and White-tailed Eagles whilst the sheltered bays attract divers and sea-ducks.

Day 5: Travel to North Uist and cross the

Sound of Harris into Lewis and Harris. Our main destination is the Butt of Lewis and its adjacent fields, lochs and scrub. Seabirds we may encounter from the 'Butt' include Manx and Sooty Shearwaters, European and Leach's Storm Petrels, Sabine's Gull, Great and Arctic Skuas and, possibly, Cory's and Great Shearwaters. Nearby fields sometimes attract vagrants including, in recent years, American Golden Plover, Pectoral and Buff-breasted Sandpipers and Ruff among the hundreds of European Golden Plovers. Passerines are few but may include migrant Snow and Lapland Buntings. The harbour at Stornoway attracts gulls and the possibility of Glaucous and Iceland Gulls. To the north of the town a small freshwater reservoir attracts Long-tailed Ducks whilst offshore we have good chances of finding skuas and other seabirds in onshore winds. Transfer to Stornoway for two nights.

Day 6: This morning we check the grounds of Stornoway Castle for any recently arrived migrants. We spend the remainder of the day exploring sites along the exposed western shore of Lewis. Rare migrants are always possible; in recent years these have included Barred Warbler, Citrine Wagtail, Isabelline Shrike and Eurasian Wryneck. If the wind is blowing onshore, we have further opportunities to watch southbound seabirds from the Butt of Lewis.

Day 7: Morning ferry to Ullapool, sea-watching en route. Transfer to Inverness where the tour concludes later in the day.

Prices

Ground Price: £1,695
Single room: £150
Deposit: £150

This holiday is fully inclusive of accommodation and meals, guidance, tips and taxes, transport and ferry fares.

Not included: insurance, drinks and items of a personal nature.
