## Contest Managers Comments:

Our Sprint contest gets more popular every year which was reflected in the very good entry received. Conditions were better than last year and top scores increased by 50%. It was good to see so many entries coming in from new operators, some working a RTTY contest for the first time. It was also the first time that anyone has made over 1000 contacts in the contest which is a very good total for a 24 hour RTTY contest. Congratulations to Jeff 9H0A for a fine win in the expert class, and to all the other class winners including Herman ON4AME who won a very close battle at the top of the single operator class with his first entry to the test.

This year the logs were all cross checked electronically, which is much more accurate and comprehensive than random manual checks. Most stations lost a few points mainly through incorrect logging of calls. This process caused some delay in producing the results as many logs had to be converted to Cabrillo format. All the major logging programs have now got this facility, and from next year only Cabrillo logs will be accepted for both our contests (and many others). Thanks to everyone who took part in the test and I look forward to seeing you all next year.

**Frank ZL2BR** .. Propagation for most of contest was extremely poor, especially during daylight hours, even the big signals became little signals. No Africans!
